Report of Medical Officer,

Downham Urban District Norfolk for 1944.

Tuberculosis.

Slight increase from 15 cases in 1943, to 17 cases in 1944.

Venereal Disease.

Not a pressing problem in this area.

Infestation & Scabies.

Conditions have much improved since the return of most of the evacuees to London. Benzyl Benzoate has been supplied by the Council free of charge where necessary.

Water.

Water supply has been satisfactory in quantity and quality.

No bacteriological examinations have been made, but the water has been chlorinated at source. The water is not plumbo-solvent.

Proportion of houses supplied from public mains.

- (a) Direct to houses - 99.8 %
- (b) By stand pipes - 0.1 %
- (c) From shallow wells - 0.1 %.
